

I am not a citizen of United States. I'm living in Sweden in Europe. For me U.S has always been the protector of the free spirit and freedom of speech. People, like I around the Globe are interested in developement of the mankind. U.S has always been the leader of it. It's important that it should continue, even in the future. That's my reason I write here.

I suggest that FCC don't change Broadcast Ownership rules. My reason for that is that public airwaves must be protected to not be owned only by a few hands. That is not freedom to choose for the public. Private or state oligopol/monopol is bad for the freedom of spirit and speech, and the developement of country.

U.S should not copy the bad politics of not-democracy and communist states.
